

Cooling and refrigeration solutions

The Modine Edge

What does Modine bring to the table? In a word, people. Our staff of experienced engineers and sales people understand the challenges faced by OEM engineers ... to design smaller, more efficient and cost-effective products.

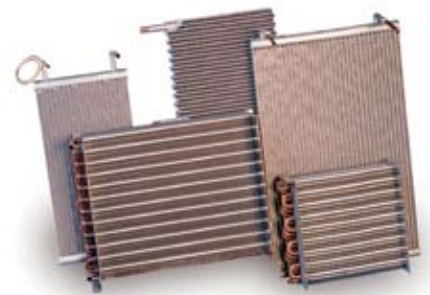

Our engineers bring their expertise to projects early, helping customers produce the best possible cooling or refrigeration solutions in a timely and economical manner.

Taking the heat ... for nearly a century

With more than 90 years of global experience in thermal management, Modine Manufacturing Company brings a solid tradition of quality cooling and refrigeration expertise to the market.

Our engineers have worked with customers the world over to produce exceptionally reliable and durable products. You'll find Modine-engineered components in every industry where efficient cooling or refrigeration is required, including:

- Commercial/residential air-conditioning systems
- Commercial/residential freezers
- Recreational vehicle air-conditioning systems and heat pumps
- Frozen confection dispensers
- Ice makers
- Refrigerated beverage dispensers
- Water coolers
- Dehumidifiers
- Vending machines
- Display cases
- Condensing units
- Specialized cooling systems

We provide these markets with proven, tested products that add value to any system.

Product range

From copper-aluminum coils to brazed-aluminum heat exchangers, our components come in a wide variety of sizes, shapes and patterns for application-specific designs. And each part is manufactured with care and skill, then tested to the most rigorous of standards.

We design, engineer, test and manufacture a wide variety of components ready to be assembled into custom cooling or refrigeration systems ... components that meet your precise specifications.

Innovation

Innovation has been one of the keys to our success as a company. Since we were founded, Modine has focused on heat transfer. Our people understand the challenges specific to efficient cooling and refrigeration ... and they have the experience and knowledge to provide effective solutions.

Reliability

It is no accident that Modine products are found more often in older – and still functioning – cooling and refrigeration systems than any other manufacturer. That's because our components provide maximum reliability and are built to last. Our product warranty is further evidence of the extent to which Modine stands behind its products.

Technical support

At Modine, we make expert technical support available to all of our customers whenever it's needed. You can count on us for:

- Custom design and engineering
- Detailed value analysis
- R&D and testing
- Chemical and metallurgical analysis
- UL and CSA certification
- World class manufacturing

An example of our innovation can be found in our pioneering PF[®] Parallel Flow brazed aluminum micro-channel heat exchangers. This breakthrough in cooling technology promises to provide cost and space savings, along with enhanced performance, to virtually every cooling or refrigeration application. Our PF Parallel Flow heat exchanger has taken compact condensers and evaporators to new levels of performance and efficiency.

Customer service

We are committed to complete customer satisfaction and can ensure that at the end of the day, we have exceeded your expectations. To support you, we provide:

- Factory direct sales support
- Inventory/consignment program
- Web site order status
- World-class quality
- On-time delivery

Contact Modine today at
262.636.1050 to find out how
our applied thermal innovations
can help you solve your
refrigeration challenges.
