

Modine NA EDI Enablement Process SPS Commerce Partnership

Overview / Benefits:

Modine Manufacturing Company has partnered with SPS Commerce to support EDI Communication implementation with Modine’s North American suppliers of raw material and purchased parts. EDI Communication is a requirement for all new productive or direct material suppliers to Modine as outlined in the Modine Global Supplier Manual available at www.modine.com/suppliers.

The benefits of EDI Communication are:

- Standardize how all Modine North American plants communicate with suppliers
- Develop consistent order and delivery methods
- Provide visibility of order and shipment status
- Automation of receiving and reconciliation of receipts
- Speed and accuracy of invoice handling and supplier payments

What are the mandatory EDI requirements for Modine?

SHIP TO PLANT BULK:
PLANNING/RELEASE (830)
ADVANCE SHIP NOTICE (856)
INVOICE (810)
APPLICATION ADVICE (824)
AIAG B-10 SHIPPING LABEL

Why SPS Commerce?

SPS Commerce is the largest provider of supply chain services and applications for the retail ecosystem. SPS Commerce is headquartered in Minneapolis, MN., and has offices in the U.S., Canada, Asia, Europe and Australia. The company has more than 55,000 customers, including retailers, vendors, grocers, suppliers, brokers, 3PLs, manufacturers and other firms. These companies fulfill goods to more than 2,000 retailers and distributors whose EDI mappings and specifications are already built out and pre-certified in the SPS Commerce data center.

SPS Commerce offers solutions to enable suppliers to comply with Modine’s EDI requirements through direct ERP based EDI, or through the use of subscription-based web-EDI using a cloud-based portal.

Next Steps
